

# Levers and supports

# Levers and supports

## Sectors

Commercial vehicles, construction equipment and off-road vehicles

## Applications

Steering axles, drive axles

## Weight-size

From 5 to 25 kg

## Plus

- Full verticalization
- 100% integrity check
- Specialization even for small batches

## Description

With presses up to 2,500 tons Casartelli Antonio produces the entire family of products.

The steering levers are supplied to the customer completely machined, ready for assembly.

Family is completed with different types of supports (mostly for safety needs). Both products are perfectly checked with 100% non-destructive testing to guarantee quality and integrity.
