

Raw axle shafts

Raw axle shafts

Sectors

Commercial vehicles, off-road vehicles, construction equipment and agricultural machinery

Applications

Drive axles, power train

Weight-size

From 5 to 100 kg

Plus

- Forging lines from 1,800 to 6,000 tons
- High automation
- Long products

Description

Through the combination of induction heating, upsetting and forging, Casartelli Antonio produces different shape of drive shafts with lengths that can exceed 1,500 mm and flange diameters greater than 400 mm. Continued investments in forging technology allow us to have wide

spread for production of these strategic family of product along with greater flexibility, even on low volumes. With the installation of the latest forging line of about 6,000 tons we have the complete possibility to produce a range of products also for "heavy" applications.
