Plus

- High mix (medium/low volume)
- Product engineering
- Specialized coatings

Description

From the first productions of the automotive market on '50s, till the current mix of products for the commercial vehicle and agricultural sector, shift forks have always been present in the history of Casartelli Antonio.

Specialized and verticalized from cold coining up to machining, with relative treatments of induction hardening and special coatings, we manufacture a product ready for logistic demands and assembly line.
